

## CS410 Weekly Report

Team Copper AI<sup>2</sup>

Performance Period: Saturday 9/20 - Friday 9/26

### Summary of Group Accomplishments:

- This week the following tasks were completed:
  - A team google drive folder was created and set up for work.
  - The team website was created on Github Pages. It is an empty website for future work/components to be added.
  - Feasibility iterations 0 and 1 were completed/
    - Feasibility iteration 0 was an empty skeleton of the presentation.
    - Feasibility iteration 1 was completed as the first iteration of the feasibility presentation.
  - Discussed and completed the group contract during the first team meeting.

Individual Contributions/Accomplishments: (to be filled out by each individual)  
Dusan Djordjevic:

- Completed Solution Statement and Solution Characteristics, set up the team website and added progress reports to the website.

Tommy Fuller:

- Completed the Who/What is affected and started working on the glossary slide.

Julian Diaz:

- Started working on the draft for the Major Functional Components, and created an initial MFC diagram.

Lynda Salinas Ascanova:

- Created an initial draft of the Current Process Flow and started working on the team website.

Savannah Todd:

- Started the initial draft of the What it Will Do and What it Will not Do slides. Also started working on the team website.

Craig Grubb:

- Completed the initial Competition Matrix.

Michael Nimitz:

- Completed the initial draft of the Problem Statement and Problem Characteristics sections.

Quin Elson:

- Completed the initial draft of the Background section. Began research on finding data for the figures.

Key Objectives for Coming Week (top level prototype development objectives)

- Continue developing the feasibility presentation for iteration 2.
- Add more content to the group website

Issues/Concerns: Examples below...

- None
